

## Automatic Extraction of Semantic Features for Action Recognition

Filesize: 2.46 MB

### ***Reviews***

*This written book is excellent. It really is rally fascinating through studying period. You are going to like the way the writer write this publication.*

*(Hadley Ullrich)*

## AUTOMATIC EXTRACTION OF SEMANTIC FEATURES FOR ACTION RECOGNITION

To download **Automatic Extraction of Semantic Features for Action Recognition** eBook, remember to refer to the hyperlink beneath and save the document or gain access to other information which might be highly relevant to AUTOMATIC EXTRACTION OF SEMANTIC FEATURES FOR ACTION RECOGNITION ebook.

LAP Lambert Academic Publishing Mrz 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - Deeper understanding on human actions is required in many applications, e.g., action recognition (security), animation (sport, 3D cartoon movies and virtual world), etc. The task of automatic extraction of semantic action features within the data set is gaining in importance. We propose novel approaches to automatically extract the action features from 3D Motion Capture data for high accuracy in real-time action recognition. In particular, we contribute to two different areas dealing with variation at different features levels, i.e., 1) Extract of Discriminate Patterns from Skeleton Sequences approach is based on features that are close to the raw data. It provides a foundation in lower dimensional representation for the movement sequence analysis, retrieval, identification and synthesis; and 2) Automatic Extraction of Semantic Action Features approach focuses on solving the high-dimensional computational problems arising from the human motion sequences. It supports the follow-up stages of processing the human movement on a natural language level. As one common underlying concept, the propose approach contains a retrieval component for extracted action features. 92 pp. Englisch.
