

# The Reality of Our Global Future: How Five Unstoppable High-Tech Trends Will Dominate Our Lives and Transform Our World

Filesize: 3.95 MB

## ***Reviews***

*Undoubtedly, this is the best function by any writer. This really is for those who statte there was not a really worth reading. Its been written in an exceptionally basic way which is merely right after i finished reading through this book by which really transformed me, change the way i really believe.  
(Dr. Deonte Hammes DDS)*

## THE REALITY OF OUR GLOBAL FUTURE: HOW FIVE UNSTOPPABLE HIGH-TECH TRENDS WILL DOMINATE OUR LIVES AND TRANSFORM OUR WORLD

Createspace, United States, 2012. Paperback. Book Condition: New. 228 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Where are we heading? Stripped of all the hype and fantasy - where really is the world economy set to take us by 2040? Those of us alive today are on an extraordinary course: For several decades our future has largely been determined by a handful of relatively-obscure trends that together generate the awesome propulsion of a High-Tech engine that is launching the international community on a voyage into completely unfamiliar territory. But where will we all end up? Based on unparalleled insights into what organizations across the globe are actually doing, for the first time the world's foremost expert on the hidden inner-workings of society explains in simple and accessible language exactly where the most deeply-established trends are taking us. How, despite claims that its accelerating progress is not sustainable for much longer, Digitization is on an inexorable course to a mind-blowing society of virtual-assistants, robot cars, cyborgs and everything on-the-record. And how Networking will combine with Digitization to lead by 2040 to computers capable of human-like interaction and an internet a billion times more powerful than today's. Dr. Scott-Morgan reveals how the Miniaturization trend offers nanotech breakthroughs ranging from cancer treatments to quantum computing - but not, as has often been claimed, Star-Trek Replicators or the threat of grey goo . And he shows how exponential Simulation will support fundamental and sweeping advances that lead to almost limitless electricity and maybe almost limitless life-extension. Our world is set for a Global Renaissance. However, the backdraft of the High-Tech launch engine is also stirring up a turbulence of unintended consequences that threaten to disrupt our trajectory. Rather than Global Renaissance, we would then enter Global...
