Excerpt: . . . 5. SUMMARY Five chemicals have been identified as potentially qualifying for revision on the basis of new IRIS or OPP health assessments that could impact the MCLG. Hexavalent chromium is under study by the National Toxicology Program (NTP, 2002). Once the subchronic and chronic studies are completed, the Agency will evaluate the toxicological data with regard to their impact on the present MCLG. Table 5 summarizes the review process applied to each of the 68 chemicals under consideration....
