The human story written in DNA continues to push the species beginnings deeper and deeper into history with mystery ancestors. Evolutions of species are inextricably entangled in a web of life that stretches through the Earth, Sun and Galaxy, and this is where the saga begins. Victorian historians, many of whom had never seen a Mayan site in the nineteenth century, dismissed Mayan paintings of a series of catastrophes 12, 500 years ago, after fire fell from the sky. The scenes were too incredible to believe when Charles Darwin's theory of evolution was the cutting edge of science and uniformitarian protocol ruled. Carbon dating in 2013 of molten debris scattered across four continents found that the heavens rained fire 12, 800 years ago. In this period, when numerous mammals disappeared, an extensive study concluded in 2013 that Bigfoots DNA mutated. The Mediterranean Sea filled with water and deluged what had been dry land. East of the still-forming sea in Turkey the oldest ritual center yet discovered was built with rare genius 12, 000 years ago. Ancient alien researcher Krsanna Duran examines the chaotic genesis of civilization and Bigfoots DNA mutation. . Global civilization flourished before glacial floods .
